RE-LEAF

BROADACRE

PROTEX RE-LEAF

The premium and complete foliar fertiliser designed for the balanced growth of all plants.

Re-Leaf contains a powerful and balanced blend of NPK, chelated trace elements and amino acids, at a neutral pH to ensure maximum plant uptake with minimum stress. Re-Leaf is applicable to all aspects of agriculture requiring the growth of healthy and robust plants.

Benefits

- As a complete foliar fertiliser, growers can rely on Releaf for providing a comprehensive range of crop requirements to ensure vigorous crops.
- A balanced application of essential elements reduces the risk of crop damage from disease and frost, and improves yield and quality.
- Re-Leaf is compatible with the majority of agro chemicals and other nutrient products.

APPLICATION RATES

Broadacre Spray apply 3-8L of concentrate with 50-100L water per hectare. Apply based on plant tissue.

Pasture Spray apply 2-5L concentrate with 40-200L water early Spring or according to plant tissue test to improve pasture quality.

Store in a cool place away from sunlight. Stir well before use.
